[Key Characteristics of Carcinogens 6-29-15 tracked kzg DD and Caldwell \(3\) Stewart.docx](#)

Dear All,

Thanks Martyn. The revised manuscript looks fine to me and the responses to reviewers, as you've drafted them, are both lucid and comprehensive.

I endorse Jane's and David's insertion of reference to the recent Carcinogenesis reviews in paragraph 2. For consideration (and acknowledging the word count barrier), I've added in that same paragraph a mention of Westcott et al (Nature 517:489-92, 2015) as indicating the evolving biological complexity of chemical carcinogenesis.

No other proposal.

Regards
Bernard.

Dear All again,

Please replace with the version just sent with this one that had just a few more very minor changes. Attached is the correct version (i.e., Key Characteristics of Carcinogens 6-29-15 tracked kzg DD and Caldwell (3).docx.

Jane Caldwell

Dear all

I have significantly revised the EHP paper on the key characteristics to respond to the Reviewer's comments and your proposed edits. I attach a version with tracked changes and the other with them accepted. I also attach a draft of our response to the reviewers. I would greatly appreciate your comments on these revisions by Friday morning 8 am PST, Berkeley time so that I can submit the revision to EHP before the July 4 Holiday weekend. If I don't hear from you by then I will assume that you are OK with all the revisions. You can send comments on any of the documents attached.

Thanks for your patience on this resubmission and for your continued involvement.

Best regards,

Martyn
